1 Generally interest will be credited monthly into Synovus CD accounts. Generally interest is credited every year and at maturity for Synovus IRA accounts. Ask a banker about other interest crediting options. The interest will be compounded daily. The interest is calculated by using the daily balance method which applies a daily periodic rate to the principal in the account each day. The interest will begin to accrue no later than the business day we receive credit for the deposit of noncash items (for example, checks) into your account.

2 If you close your account before interest is credited, you may receive the accrued interest. No withdrawals allowed during a term. The annual percentage yield is based on an assumption that interest will remain in the account until maturity. A withdrawal will reduce earnings. Additional deposits not allowed until maturity.

3 Automatically Renewable Account. Account will automatically renew at maturity. Each renewal term will be the same as the original term, beginning on the maturity date. The interest rate and annual percentage yield have not yet been determined. They will be available on the date of maturity. You have a grace period of 10 calendar days (1 calendar day grace period for 7-89 day CDs) after maturity to withdraw the funds without being charged an early withdrawal penalty. You may prevent renewal if you withdraw the funds in the account at maturity (or within the grace period, if any) or we receive written notice from you before maturity of your intention not to renew.

4 A penalty will be imposed for withdrawals before maturity. The early interest penalty is calculated on the principle amount being withdrawn according to the term. In certain circumstances, such as the death or incompetence of an account owner, the law permits, or in some cases requires, the waiver of the early withdrawal penalty. Other exceptions may also apply, for example, if this is part of an IRA or other tax-deferred savings plan. We reserve the right to treat any withdrawal which would reduce the balance remaining in the account below the required minimum initial deposit or minimum balance as a withdrawal of the entire account balance and calculate the amount of the penalty accordingly.

Order of Payment – This section describes our general practice for paying transactions from your account. We may vary the order of payment if items are presented that cannot be returned unpaid. We reserve the right to change how we pay transactions from your account and will provide you notice of these changes. After the close of the business day, we add your deposits and other credits to your account. We then deduct any fees and charges owed to us. Finally, we deduct all items presented for payment. The order these items are deducted from your account balance is based upon the type of transaction and, for electronic transactions, when the transaction was performed by you or was received by us. First, we pay outgoing wire transactions in the order they were made. Then, we pay electronic transactions (First, we pay preauthorized ACH debits, then ATM transactions, and then check card transactions.) in the order they were performed by you or were received by us. Next, we pay unnumbered checks and other items drawn on your account by dollar amount in ascending order. Finally, we pay checks drawn on your account in ascending check number order.
